 GITHUB

[FULL RÉSUMÉ HERE](#)

Founding Engineer & Co-founder of an **AI SaaS** adopted by **PayFit, Canva & Notion**. Comfortable across the **full stack**, from system design and API architecture to UI animations and product quality. I write **strict TypeScript**, care about **type-safe end-to-end systems**, and ship products that hold at scale.

Experience

- Founding Engineer & Co-founder · [KAWAAK](#) · Nov. 2024 → Present**
AI-powered LinkedIn content SaaS, built from scratch with a team of 3.
 - +23K users · +€200K ARR · adopted by PayFit, Canva, Notion · 4.8/5 (150+ reviews)**
 - Full-stack architecture: NX monorepo, React / Vite (strict TS), Node / Express / Zod type-safe backend, MongoDB + Redis + BullMQ
 - Multi-LLM orchestration (OpenAI, Anthropic) · Clerk auth · Stripe + PayPal · AWS · Sentry / PostHog / Mixpanel
 - End-to-end ownership: architecture, code review, deployment, observability, user support
- Founder & CEO · [FOREVR](#) · 2025 → Present**
Digital memorial platform where families preserve and share memories (photos, videos, audio) through a QR code engraved on a plexiglass plaque. Built with Next.js / React / TypeScript.
- Founder & CEO · [KEYPOP](#) · 2023 → Present**
Desktop app (Electron) and Chrome extension that bind AI prompts to keyboard shortcuts.
- Full-stack Engineer · [WAALAXY](#) · May 2022 → Nov. 2024**
LinkedIn prospecting platform, **+1M users**, team of 16 engineers.
 - Built **vector-search lead discovery (Pinecone)** into the onboarding flow, lifting **conversion by +80%** (validated via A/B testing)
 - Shipped an **email prospecting service** that **increased 10x email send volume + native HubSpot integration**
 - High-throughput micro-services architecture: event-driven (Kafka), MongoDB, containerized deployment
- Front-end React Developer · [CODÉIN](#) · Jun. 2021 → Aug. 2021**
Built **90% of the new web interface** for [OPPBTP](#)'s personnel management tool in React TypeScript.

Technical stack

Front-end	 TypeScript  React  Next.js  Vite  Styled-Components  React Query  CSS3
Back-end	 TypeScript  Node.js  Express  Zod  REST  WebSockets
Data & Infra	 MongoDB  PostgreSQL  Redis  Kafka  BullMQ  Docker  Terraform
Practices	 Monorepo NX  Continuous Delivery  Code Review  Web Scraping

Education

- M.Sc. Software Engineering** · University of Sherbrooke (Québec, Canada) (*double degree*) · 2021–2022
- Engineering Degree, CS & Management** · Polytech Montpellier (*double degree*) · 2019–2022
- 2-year Computer Science Degree (DUT)** · IUT de Blagnac · 2017–2019

Languages

 **French** · Native ·  **English** · C1 / TOEIC 910
