Full résumé

Full-stack engineer: I design, ship and **monitor in production** software that holds at scale, from an **event-driven platform with 1M+ users** to the **AI SaaS** I co-founded, adopted by **PayFit, Canva & Notion**. **Strict TypeScript, agentic development workflows**, and a real bar for **UX**.

Professional Experience

- FOREVR** · Founder & CEO · Montpellier, France · **July 2026 - Present**
Digital memorial SaaS, **carried end to end on my own**: product, architecture, delivery, QA and support.
 - Next.js (**App Router**) / React / TypeScript, MongoDB, Stripe · **494 Playwright e2e tests · monitored in production** (Sentry, Umami)
 - Agentic pipeline in production**: SEO strategy driven through **MCP** and **10 articles/week** shipped, automated **Sentry** issue resolution, weekly monitoring, **Slack** reports
- KAWAAK** · Tech Lead & Co-founder · Montpellier, France · **November 2024 - July 2026**
AI-powered LinkedIn content SaaS, built from scratch with: ML engineer and Growth Marketer.
 - 23K+ users · €200K+ ARR · adopted by PayFit, Canva, Notion · 4.8/5 (150+ reviews)**
 - Modular and scalable** full-stack architecture: NX monorepo, React / Vite (strict TS), [express-zod-api](#) backend, MongoDB + Redis + BullMQ, Pusher, AWS, multi-LLM orchestration
 - Full ownership of the project, from the idea to production**, in an **agile team (weekly** with the CEO)
- WAALAXY** · Software Engineer, Full-stack · Montpellier, France · **May 2022 - November 2024**
LinkedIn prospecting platform, **1M+ users**, team of 16 engineers, 2 EMs, 3 PMs, 2 designers, 2 QAs.
 - Automated data pipeline from production (MongoDB) to a Snowflake warehouse**, enriching and categorising **500M+ prospects and 1B+ actions** for analytics and targeting
 - Designed **Prospect Finder**, keyword and filter vector search (Pinecone) across those **500M+ profiles**, with PM, designer and growth: **+80% conversion** at onboarding (A/B testing)
 - Shipped an **email prospecting service (×10 volume)** and a **native HubSpot integration**, designed with the **Engineering Manager**, on a **service foundation** (DAO, controllers, routes, middlewares) I co-defined
 - Reviewed the team's pull requests, mentoring** (pair programming, onboarding) and **tech meetups** shared with the tech teams; weeks dedicated to support bugs, in pairs, handed over at the end of the week
- KEYPOP** · Founder & CEO · Montpellier, France · **2023 - 2024**
Electron desktop app (macOS / Windows / Linux) + Chrome extension binding AI prompts to keyboard shortcuts.
- CODÉIN** · Front-end React Developer · Montpellier, France · **June 2021 - August 2021**
Built **90% of the new HR web interface** of [OPPBTP](#) in React TypeScript.

Technical Skills

Front-end	 TypeScript	 React	 Next.js App Router	 React Query	 Tailwind CSS		
Back-end	 Node.js	 Express	 Zod	 API REST	 WebSockets	 Socket.io	 Stripe
Data	 PostgreSQL	 SQL	 MongoDB	 Redis	 Kafka	 Snowflake	 BullMQ
Infra, CI & Quality	 Docker & Compose	 CI/CD	 Playwright	 Code Review	 Sentry	 AWS	
AI & Agents	 AI agents	 MCP servers	 Multi-LLM orchestration				

Education

- M.Sc. Software Engineering** · University of Sherbrooke (Québec, Canada) (*double degree*) · 2021-2022
- Engineering Degree, CS & Management** · Polytech Montpellier, France (*double degree*) · 2019-2022
- B.Tech. Computer Science** · IUT de Blagnac, France · 2017-2019

Languages

French · Native · **English** · C1 / TOEIC 910
