

Julien Wiegandt

Senior Software Engineer · Founding Engineer · TypeScript / React / Node.js · 5+ years xp

🇫🇷 Montpellier, France | wiegandtjulien2@gmail.com | +33634087380 | [LinkedIn](#) | [Book a meeting](#) | [GitHub](#) | [Full résumé](#)

Full-stack engineer: I design, ship and **monitor in production** software that holds at scale, from an **event-driven platform with 1M+ users** (Kafka) to the **AI SaaS** I co-founded, adopted by **PayFit, Canva & Notion**. **Strict TypeScript**, type-safe end to end, and a real bar for **UX**: a product is only good if people want to use it.

👛 Professional Experience

- [FOREVR](#) · Founder & CEO · Montpellier, France · [July 2026 - Present](#)
Digital memorial SaaS to remember the people we love · **500+ visitors/month**.
 - Carried end to end on my own: product, design, engineering, **business, SEO/SEA, growth and marketing**
 - Next/React/TS, MongoDB, Stripe · **494 Playwright e2e tests** · **monitored in production** (Sentry, Umami)
- [KAWAAK](#) · Tech Lead & Co-founder · Montpellier, France · [November 2024 - July 2026](#)
AI-powered LinkedIn content SaaS, built from scratch with: ML engineer and Growth Marketer.
 - **23K+ users** · **€200K+ ARR** · **adopted by PayFit, Canva, Notion** · **4.8/5 (150+ reviews)**
 - **Flexible and scalable** full-stack architecture: NX monorepo, React / Vite (strict TS), [express-zod-api](#) backend, MongoDB + Redis + BullMQ, AWS, multi-LLM orchestration, Stripe + PayPal, Sentry / PostHog / Mixpanel
 - **Full ownership of the project, from the idea to production**, in an **agile team (weekly)** with the CEO
- [WAALAXY](#) · Software Engineer, Full-stack · Montpellier, France · [May 2022 - November 2024](#)
LinkedIn prospecting platform, **1M+ users**, team of 16 engineers, 2 EMs, 3 PMs, 2 designers, 2 QAs.
 - **Automated data pipeline from production (MongoDB) to a Snowflake warehouse**, enriching and categorising **500M+ prospects and 1B+ actions** for analytics and targeting
 - Designed **Prospect Finder**, keyword and filter vector search (Pinecone) across those **500M+ profiles**, with PM, designer and growth: **+80% conversion** at onboarding (A/B testing)
 - Shipped an **email prospecting service (×10 volume)** and a **native HubSpot integration**, designed with the **Engineering Manager**, on a **service foundation** (DAO, controllers, routes, middlewares) I co-defined
 - **Reviewed the team's pull requests, mentoring** (pair programming, onboarding) and **tech meetups** shared with the tech teams; weeks dedicated to support bugs, in pairs, handed over at the end of the week
- [KEYPOP](#) · Founder & CEO · Montpellier, France · [2023 - 2024](#)
Electron desktop app (macOS / Windows / Linux) + Chrome extension binding AI prompts to keyboard shortcuts.
- [CODÉIN](#) · Front-end React Developer · Montpellier, France · [June 2021 - August 2021](#)
Built **90% of the new HR web interface** of [OPPBTP](#) in React TypeScript.

🔧 Technical Skills

Front-end	 TypeScript	 React	 Next.js	 React Query				
UI & Motion	 Styled-Components	 Tailwind CSS	 Framer Motion	 GSAP				
Back-end	 Node.js	 Express	 Ruby on Rails-learning	 Zod	 API REST	 Stripe		
Data	 SQL	 PostgreSQL	 MongoDB	 Redis	 Kafka	 Snowflake	 Pinecone	 BullMQ
Infra	 AWS	 Docker	 Terraform	 Sentry				
Tests & Practices	 Playwright	 Monorepo NX	 Continuous Delivery	 Code Review	 Agile	 AI-assisted workflows
